

PORTRAIT OF A GRADUATE

A portrait of a graduate is an important framework that helps educators and schools to define the skills, knowledge, and dispositions that they hope their students will develop by the time they graduate. It provides a clear and concise picture of the qualities and attributes that students need to thrive in the world beyond the classroom. By establishing a portrait of a Christian Heritage School graduate, we can set clear goals for our students and ensure that they are prepared for success in college, career, and life.
